linkedin.com/in/shaik-rashid

I am a full stack developer with experience in front-end and back-end technologies. I build and maintain web applications using HTML, CSS, JavaScript, React, NextJS, Node.js, and databases like MongoDB and SQL. I enjoy coding, problem-solving, and learning new technologies.

## EDUCATION

- Bachelor of Technology - CSE**  
Vignan Institute of Information Technology  
08/2021 - Present

## PERSONAL PROJECTS

### GoFood (06/2023 - 06/2023)

- GoFood, a web application for ordering food online. Users can browse menus, place orders seamlessly. The app is built with a focus on user-friendly design and efficient functionality.
- **Tech Stack:** React js, Node js, Express, MongoDB, Redux.

- Github : [https://github.com/Rashid075/Food\\_Delivery](https://github.com/Rashid075/Food_Delivery)

### Digital-Ballot (04/2024 - 05/2024)

- Digital-Ballot, a web application which allows the eligible users to cast their votes remotely through an initiative and user-friendly interface.
- **Tech Stack:** React js, Firebase.
- Website Link: <https://rashid075.github.io/Digital-Ballot/>
- Github: <https://github.com/Rashid075/Digital-Ballot/>

### HelperBot (02/2024 - 02/2024)

- HelperBot, a Mobile app that uses the ChatGPT API to respond to user queries and the DALL-E API to generate images based on user input.
- **Tech Stack:** React Native, CSS.
- Github: [https://github.com/Rashid075/React\\_Native](https://github.com/Rashid075/React_Native)

### Idea-Fusion (05/2024 - 06/2024)

- idea-Fusion, a platform where you can share your innovative ideas, collaborate with like-minded people, and bring your visions to life.
- **Tech Stack:** React js, Node js, MongoDB, Express, Tailwind.
- Github: [https://github.com/Rashid075/Idea\\_Fusion](https://github.com/Rashid075/Idea_Fusion)

## WORK EXPERIENCE

- React Developer**  
Next24tech Technology & Services  
04/2024 - 06/2024

### Achievements/Tasks

- User Authentication and Authorization: Developing secure login mechanisms to authenticate and authorize users.
- Ballot Creation & Vote Casting: Creating a electronic ballot and enable the users to cast their votes through the online website.
- Results and Security Measures: To determining the results and implementing the security measures to safeguard the voting process against fraud or unauthorized access.

## SKILLS

## PROFILES

CodeChef Profile

LeetCode Profile

GitHub Profile

Portfolio

## CERTIFICATES

The MERN Fullstack Guide (09/2023 - 11/2023)

Javascript Essentials (05/2023 - 06/2023)

SQL Foundation- Self Paced (07/2023 - 08/2023)

Frontend Development with ReactJS  
(06/2023 - 06/2023)

Programming Essentials in Python  
(05/2024 - 05/2024)

The Ultimate Fullstack Guide (03/2023 - 05/2023)

Responsive Web Design (01/2023 - 02/2023)

## ACHIEVEMENTS

Solved 200+ competitive programming questions over Codechef, Leetcode and GeeksForGeeks.

Got Special appreciation prize for idea and implementation in Hackathon conducted by VIIT
